

AMAN ADITYA | Software Engineer

India • amanaditya565@gmail.com • +91 7979928386

SUMMARY

Computer Science graduate with experience supporting and troubleshooting web-based SaaS products in production. Skilled in Python, SQL, REST APIs, Postman, authentication flows, HTTP, application logs and root-cause analysis. Experienced in reproducing customer-reported defects, validating fixes with engineering and product teams, documenting technical findings, and building web applications with React, TypeScript and Node.js.

SKILLS

Programming Languages: Python, JavaScript, TypeScript, HTML5, CSS3, SQL

Frameworks and Libraries: React.js, Node.js, Tailwind CSS, REST API

Troubleshooting & Version Control: Postman, Browser Developer Tools, Git

Soft Skills: Problem-solving, Team Collaboration, Effective Communication, Analytical Thinking

EXPERIENCE

Technical Support Executive | OnceHub Technologies Pvt Ltd

- Diagnosed and resolved technical issues across web-based SaaS product by investigating browser behavior, API requests, authentication flows and application logs.
- Reproduced customer-reported defects, formed and tested root-cause hypotheses, and collaborated with engineering and product teams to implement and validate fixes.
- Documented reproducible bug reports with detailed steps, logs and environment information, reducing turnaround time for engineering investigations.

PROJECTS

Support Analytics Platform:

- Built a production-style analytics dashboard inspired by enterprise SaaS platforms to visualize customer support metrics using reusable React components
- Designed responsive dashboards with interactive charts, advanced filtering, pagination, searchable data grids and CSV export.
- Implemented optimistic UI updates, API caching and lazy loading to improve responsiveness.

Component Library:

- Developed reusable design system containing 30+ UI components including tables, modals, drawers, dropdowns, accordions and form controls.
- Built fully responsive components supporting dark mode and theme customization.
- Implemented accessibility standards including keyboard navigation and ARIA attributes.

Tour Vista – Tourism Analytics Platform:

- Analyzed 500+ destination and route records stored to support data-driven travel insights.
- Implemented graph-based shortest path algorithms, reducing route selection time by 30–40%.
- Evaluated distance, cost, and connectivity factors to improve travel efficiency and user experience.

CERTIFICATION

- Salesforce Launchpad Program – PwC: Industry-focused training on IT fundamentals, MySQL, and Salesforce basics
- Introduction to Relational Databases (IBM): Database design, SQL queries, and data modeling.
- Relational Database Administration: Backup, restore, user roles, and permissions.

EDUCATION

Bachelor of Engineering in Computer Science | Chandigarh University

Jul 2022 - 2026

SGPA: 8.26/10
